Welcome to the Montreat Wilderness, property of Montreat Conference Center. All guests and hikers must check in at the front desk of Assembly Inn and abide by all rules and regulations when hiking in the Montreat Wilderness.

For more information about Montreat Conference Center or the Montreat Wilderness, visit montreat.org

In case of emergency, dial 911.

The Montreat trails are located on the private property of the Montreat Conference Center. Please follow all safety and conservation rules posted at the Nature Center and at most trailheads. Montreat Conference Center is a "hike at your own risk" facility.

When hiking in the woods, you may come across trails that are not drawn on the map. Also, from time to time, there will be relocations of trails. It is important to stay alert and be aware of your surroundings. Please observe the Buncombe County leash law which requires all pets to be leashed.

The blazed trails in Montreat are marked with colored, plastic diamonds that are nailed onto trees. The following descriptions include the approximate one-way distance of each trail. The difficulty level mentioned and the time an "average Montreat hiker" takes to hike a trail one-way are both highly subjective but may be helpful to you as you plan your hike.
Monont Trail Descriptions

BE AWARE: some trails may only be accessed by first hiking a long distance to the trailhead. Bicycles are only allowed on Rainbow Road, Appalachian Way, and Old Mitchell Toll Road.

1) The Gate Trail | Blue, Easy, 0.95 mi/30 min | Trailhead is located in the gravel parking lot just east of the Montont Gate. The trail follows Flat Creek and has informative signs posted and benches on which to rest. This trail is an extension of the old Nature Trail and includes "Elizabetht’s Path."

2) Rainbow Mountain Trail | Gray, Strenuous, 0.63 mi/50 min | Access trailhead across Flat Creek by using the Gate Trail bridge. Go right until you find the gray blazes next to the town service building. This trail is very steep in places. The trail goes over one of the two peaks of Rainbow Mountain before joining Rainbow Road. You can success Rainbow Road by taking a side trail to the left before the summit.

3) Rainbow Road | Orange, Easy, 1.78 mi/50 min | Trailhead is at the gateway road at the end of the lower Lookout parking area. The trail follows an old roadbed most of its length. The trail ends at Rainbow Gap where the Old Trestle Road and the Old Mitchell Toll Road split near Lookout Trail. The trail does not have a designated terminal.

4) Lookout Trail | Yellow, Moderate, 0.71 mi/45 min | Trailhead is in parking area off Lookout Road. The trail crosses the Old Trestle Road and climbs steeply to end at the exposed rocks below the summit of Lookout Mountain with views of Montont and the Seven Sisters. Please stay on the marked trail; this mountain has many visitors and old trails have been decommissioned to combat erosion.

5) East Ridge Trail | Gray, Moderate, 1.98 mi/2.5 hr | Trailhead is located at the end of Lookout Trail. The trail follows the ridge over Lookout Mountain, Boggs Bunion, Brushy Mountain and Rocky Head and ends at Long Gap. There are a few steep sections and several good views. The East Ridge is part of the Blue Ridge from Boggs Bunion north.

6) Hickory Ridge Trail | Blue, Easy, 0.12 mi/5 min | Trailhead is at the summit of Lookout Mountain. The trail ends at the Old Mitchell Toll Road. Follow the Old Mitchell Toll Road south for 60 yards to find Rattlesnake Mountain Trail (property of Ridgecrest Conference Center).

7) Buck Gap Trail | Blue, Moderate, 0.1 mi/10 min | Trailhead is behind the Shelter on the Old Trestle Road. The trail ends at Buck Gap where it intersects the East Ridge Trail.

8) Sanctuary Trail | Orange, Easy, 0.26 mi/15 min | The trail follows the steep gorge carved out by Little Slab Branch. The trailhead is near the parking area for the Walk Jones Wildlife Sanctuary. Opposite the trailhead for the Graybear Trail. After crossing Uphard Way, the trail continues past the site of old watercourses, crosses the stream on a bridge, and proceeds to climb till it ends at the Julia Woodward Trail, 150’ south of the Harry Bryan Trail.

9) Rocky Head Trail | Orange, Strenuous, 0.73 mi/1.5 hr | Trailhead is behind the upper bathhouse on the right in the Montont Campground. The trail climbs steeply and passes old water holding ponds that were used for an electrical generation plant in the early 1900s. The trail ends at the summit of Rocky Head Mountain where it intersects the East Ridge Trail. There is a view of the valley at the summit.

NOTE: On the road just beyond campsite #21 is a sign pointing to a steep but short route to the top of an old mine cave.

10) Stomping Knob Trail | Yellow, Strenuous, 0.97 mi/2 hr | Trailhead is located on Harmony Road and ends with the junction of the West Ridge Trail at the summit of Little Piney Mountain (also called Stomping Knob). The trail is extremely steep in some places and passes two old still sites, one of which is under a large rock overhang.

11) Big Piney Ridge Trail | Orange, Moderate, 1.2 mi/2 hr | It shares a trailhead with Lower Piney Trail at the end of Suwannee Drive. The trail shifts after about 2/3 of a mile and Big Piney goes uphill to the junction with the West Ridge Trail. There is an excellent view of Black Mountain from Rattlesnake Rock near the end of the trail.

12) West Ridge Trail | Gray, Strenuous, 2.74 mi/4 hr | This trail is recommended for experienced hikers only and is very rugged. Trailhead is located at the end of Stomping Knob Trail and the trail ends at the intersection of Old Trestle Road and Little Slab Mountain (False Graysbear). Do not leave the trail on the west side of the ridge—the Ashville Watershed is closed to hiking.

13) Graybear Trail | Blue, Moderate, 4.64 mi/4 hr | Trailhead is in the parking area across the road from the Walk Jones Wildlife Sanctuary. Take the bridge across Flat Creek and follow the creek upstream, bear right at the intersection with Big Piney Trail. The trail intersects the Old Trestle Road. Turn left and follow the trestle switchbacks. Bear right at the Shelter site, and again turn right sharply at the intersection with the West Ridge Trail. Graybear Mountain is the highest point in Montont, and the peak has views to the North and East and of the Craggies to the west.

14) Walker's Knob Trail | Orange, Easy, 0.12 mi/15 min | Trailhead is at the intersection with Graybear Trail by the hiking Shelter. End is at Walker’s Knob with a superlative view of the entire Montont Valley.

15) Julia Woodward Trail | White, Easy, 0.52 mi/30 min | Trailhead is located at the Graybear Trailhead; however, instead of crossing the bridge, continue on up the road a short way. The trail turns left on a driveway.

16) Harry Bryan Trail | Yellow, Easy, 0.37 mi/30 min | Trailhead is located at the intersection with the Julia Woodward Trail. The path travels gently up and down through the woods of the Bell Forest to cross Flat Creek at the upper bridge, ending at Graybear Trailhead. (This trail allows for a 1.74 mile connecting loop using the lower parts of Julia Woodward and Graybear Trails and/or Sanctuary Trail.)

17) Rocky Knob Trail | White, Strenuous, 0.29 mi/30 min | NOTE: This trail is not in Montont, but the Montont Cottagers purchased the land to protect the summit in a permanent conservation easement as part of the Southern Appalachian Highlands Conservancy. A long hike is required to get to the trailhead which begins on the Old Mitchell Toll Road between the upper parts of the Old Trestle Road and Pinnacle Mountain. If coming from Montont and looking for this trail, please be aware that it is NOT the obvious wide path going straight up the mountain that was caused by four wheelers. Go farther up the Old Toll Road. Trailhead is to the left just after an "outside" curve, an old gated road drops down to the right just beyond. The path is faint at times, but ends on a rocky summit with spectacular views of the Ashville Watershed.

18) Appalachian Way | Unmarked, Moderate, 0.63 mi/30 min | Trailhead is at the end of the paved portion of Appalachian Way. The gravel road then climbs to end at Sourwood Gap where it intersects both the East Ridge Trail and the Old Mitchell Toll Road.

19) Old Trestle Road | White, Easy | The Old Trestle Road is part of the historic logging railroad route that went from Black Mountain to Mount Mitchell in the early part of the 1900s. It is called the Trestle Road because it had three trestles to span the creeks along the route. Between Sourwood Gap and Long Gap the railroad followed the route that we now refer to as the Old Mitchell Toll Road. The sections of the Old Trestle that are maintained are shown with a railroad symbol on the map.

20) Old Mitchell Toll Road | Unmarked, Easy | When the railroad shut down, a capitalist venture wanted to build a tourist road for automobiles along the route of the old railroad bed. Montont wanted the road to be moved to the other side of the ridge to minimize noise and traffic in the valley. Montont won in court, and the road was re-routed in places. The Toll Road follows the route of the old Trestle Road EXCEPT between Rainbow Gap and Sourwood Gap and between Long Gap and where the upper part of the Old Trestle Road intersects with the Old Mitchell Toll Road north of Graybear Falls. This road is not recommended for foot travel during bear hunting season, and bikes are prohibited entirely during hunting season as per the signs posted at Sourwood Gap.

21) Lower Piney Trail | Blue, Easy, 1.18 mi/45 min | North trailhead is end of Suwannee Drive and starts along with the Big Piney Trail. South trailhead is a gravel road at the top of Harmony Road. Trail is easy, <10% grade, flat tread. The view is in middle of the trail, with less than 250 ft. elevation gain. The trail can be walked as out/back or as a road/trail loop via Graybear Trail and return via Harmony and Louisiana Road.

22) Rattlesnake Trail | Not Part of Montont Wilderness | Rattlesnake Trail crosses paths with several Montont Conference Center and Montont Wilderness Trails, but is not owned, maintained, or operated by Montont Conference Center. It is a part of the Ridgecrest Trail system.
